ABOUT ME

Software Developer with 2.4+ years of experience in designing, developing, and maintaining mobile applications. Skilled in working with startups and contributing across all stages of the development lifecycle. Passionate about learning new technologies and solving complex challenges through innovative solutions.

WORK EXPERIENCE

Telestratum Networks Pvt Ltd – Bangalore, India

City: Bangalore | Country: India

Software Engineer (Mobile Applications)

[01/05/2023 – 18/04/2025]

- Designed and developed Android applications using Kotlin, Java, and Android SDK following MVP, and MVC.
- Built responsive and modern UIs using XML, Jetpack Compose, React Native, and Material Design.
- Optimized app performance with Kotlin Coroutines, Flow, RxJava, and WorkManager.
- Integrated RESTful APIs, Retrofit, WebSockets, and gRPC for real-time data synchronization.
- Managed secure data handling with Room Database, Firestore, SharedPreferences, and AES Encryption.
- Automated CI/CD pipelines using GitHub Actions, Gradle, and Play Store Release workflows.

OmniPayments Software Pvt Ltd – Mumbai, India

City: Mumbai | Country: India

Software Developer (Android Development)

[23/04/2025 – Current]

- Designed and built , user-friendly banking and payment app screens using XML aligned with Material Design.
- Integrated Web Services for account management, secure payments, and transaction tracking.
- Stored data securely using SharedPreferences with support for encrypted and regular storage.
- Implemented JWE (JSON Web Encryption) to protect sensitive customer and payment data.
- Integrated mPOS devices and card readers, allowing users to make real-time payments using insert (chip), swipe (magstripe), and tap-to-pay (contactless) transactions through the app.
- Tested, debugged, and optimized the application using Logcat and physical device testing to ensure security, reliability, and smooth performance in production.

EDUCATION AND TRAINING

B.Tech in Electronics and Communication Engineering

Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and Technology [01/05/2019 – 01/05/2023]

City: Chennai | Country: India | Website: <https://www.veltech.edu.in> | Final grade: A

LANGUAGE SKILLS

Mother tongue(s): Hindi

Other language(s):

English

LISTENING C2 READING C2 WRITING C2

SPOKEN PRODUCTION C2 SPOKEN INTERACTION C2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

SKILLS

Programming Languages :

Kotlin / java / JavaScript / TypeScript

UI/UX Design :

jetpack compose / React Native / Xml

Database & Storage :

Room DB / SharedPreferences / Firebase Firestore / AsyncStorage

Networking & APIs :

RESTful APIs / Retrofit / WebSockets / Web services / gRPC / JSON, Gson / Axios, Fetch API

Testing & Debugging :

Unit Testing (JUnit, Mockito) / UI Testing (Espresso) / Performance Monitorin / API Testing (Postman)

CI/CD :

Git / GitHub / Bitbucket / GitHub Actions / Gradle

Tools & Development Environment :

Android Studio / VS Code / Postman

PROJECTS

Split Money App

Technologies : Kotlin, Java, Android SDK, Firebase, WebSockets, Room DB, Jetpack Compose

- Built a group expense management app enabling account creation, login, and money-splitting among users.
- Implemented user profile with QR code generation, allowing quick contact addition via scanning.
- Enabled real-time group chat using WebSockets to share expense details (amounts & descriptions).
- Integrated Firebase Cloud Messaging (FCM) for push notifications on transactions and group updates.

PaySecure App

Technologies : Java, XML, Android SDK, Firebase, Retrofit, SharedPreferences

- Developed a prototype payment app with secure signup, login, and payee management.
- Designed modern Material Design UI using XML for seamless user experience.
- Integrated REST APIs with Retrofit for mock transactions and history retrieval.
- Implemented session management and secure local storage with SharedPreferences & Firebase Authentication.
